BRITISH ACCREDITATION COUNCIL INSPECTION REPORT

Independent Higher Education (IHE) Full Inspection

NAME OF INSTITUTION:	Unicaf University				
ADDRESS:	UNICAF Building Old International Airport 7130 Larnaca Cyprus				
HEAD OF INSTITUTION:	Dr Nicos Nicolaou				
DATE OF INSPECTION:	7, 9 & 11 October 2019				
ACCREDITATION STATUS AT INSPECTION: Unaccredited					
DECISION ON ACCREDITATION:					
$\hfill \square$ Accreditation awarded for the full fo	ur-year period				
☑ Probation accreditation					
☐ Decision on accreditation deferred					
☐ Award of accreditation refused					
DATE: 30 January 2020					

PART A - INTRODUCTION

1. Background to the institution

Unicaf University (UU/the Institution) is a privately-owned independent university which offers accredited bachelors, masters and doctorate degrees via distance learning as well as through a blended learning option in Malawi and Zambia. The administrative office of Unicaf University Federal is based in Larnaca, Cyprus, and the Institution has campuses in Malawi and Zambia. The Institution also has learning centres offering enrolment advice and access to computer labs, internet and other student services in nine other African countries including Egypt, Ghana, Kenya, Uganda, Rwanda, Morocco, Nigeria, South Africa and Zimbabwe. New campuses are currently being developed in Uganda and Rwanda. In addition, a new university license has been awarded in Zimbabwe. The application for accreditation and the inspection only covers the provision in Malawi and Zambia.

The vision of UU is to become a lead provider of higher education combining e-learning with face-to-face instruction, and to contribute to relevant scientific research which serves the interests of local countries and communities across sub-Saharan Africa. The Institution aims to contribute to the educational and economic development of local communities through the provision of accessible, internationally recognised education programmes which focus on developing professional skills. Programmes are made accessible and affordable to low income groups through scholarships which offer up to 80 per cent discount on fees.

The mission of UU is to assist students to become educated individuals, to achieve their academic and career goal and to assume responsible roles in a changing world of international co-operation and interdependence.

Unicaf University is owned by Unicaf, which received investment from the Commonwealth Development Corporation (CDC) Group, which is the UK Government's Development Finance Institution, Goldman Sachs, EDEX and University Ventures in the United States.

The Chief Executive Officer of the Institution is supported by officers in the various departments and the Chief Academic Officer/Vice Chancellor Unicaf University Federal, and reports to the UNICAF Board of Directors. Each full campus has its own Vice Chancellor and Pro-Vice Chancellors who operate in line with their local regulatory authority requirements, with oversight of standards and administration provided through the administrative office of Unicaf University Federal in Cyprus. The staff at the administrative office include the Deans of Faculty, academic programme development teams, financial and administration departments and online library management staff as well as student support services.

Unicaf was founded in 2012 as the e-learning extension of EDEX to specialise in online provision. Unicaf's university brand was established in Malawi in 2016 and in Zambia in 2017. The administrative office and the campuses work together to provide admissions services, online course access, student support services and administrative support.

2. Brief description of the current provision

All Unicaf University programmes are offered online with a blended learning option available for students enrolled with Unicaf University Malawi campus approved provision and with Unicaf University Zambia campus accredited programmes. The blended learning option includes face-to-face tutorials and some additional subject based classes to support students' understanding of the module content.

In Malawi, seven undergraduate programmes are offered including a Bachelor of Arts (BA) in Business Administration, BA in Hospitality Management, Bachelor of Science (BSc) in Computer Science and BSc in Supply Chain Management and Logistics, BSc in Accounting, BSc in Finance and BA in Economics and Business. The postgraduate provision includes master's degrees in Business Administration, Education, Organisational

Psychology and Public Administration. The following master's degrees have been recently registered but provision is not yet launched: MBA Management Information Systems, MBA Health Management, MBA Oil, Gas and Energy Management, MBA Management, MSc in Healthcare Management and MSc in Web Design and Development. In addition, the university offers the following doctorate degrees: Doctor of Business Administration (DBA), Doctor of Education (EdD) as well as Doctor of Philosophy (PhD) in Marketing Management, Information Technology (IT), Education, Business Administration and Accounting and Finance.

Unicaf University Zambia campus offers undergraduate programmes in Accounting and Finance, Hospitality Management, English Language and Literature, Law and Business Administration as well as master's provision in Business Administration, Business Administration in Management, Business Administration in Finance, Business Administration in Oil, Gas and Energy Management, Business Administration in Health Management, Business Administration in Management Information Systems, Law, Education, Educational Leadership and Management, English Language and Literature, Managerial Psychology, Healthcare Management, Public Administration and Web Design and Development. Three doctorates are offered in Philosophy, Business Administration and Education.

At the time of the inspection, 7,010 students were enrolled, with 2,878 studying with Unicaf University Malawi campus and 4,132 registered with Unicaf University Zambia campus. The significant majority of students are enrolled on postgraduate programmes. The current numbers represent a significant growth on the previous year's enrolments of 3,050. A small majority of the students are female and students are drawn from a wide range of countries including Nigeria, Zambia, Malawi, Kenya, Ghana, Jamaica, Botswana, South Africa and Egypt, as well as further afield in Europe, Asia, the Caribbean, and South America. No students under 18 years old are accepted.

Students are enrolled on a continuous basis for all provision as part-time learners, and the large majority of students are in employment.

3. Inspection process

The inspection was undertaken by a team of three inspectors, including a student inspector. A one-day visit was made by two inspectors to the administrative office of Unicaf University Federal in Cyprus, prior to travelling to Malawi and being joined by the student inspector for one day visits to the Malawi and Zambia campuses. Meetings were held with the Vice Chancellor and the Senior Managers, admission and support staff and the student information system and staff records were inspected in Cyprus. Meetings were also held with the Vice Chancellors, the Senior Managers, teaching staff, students and administration, and admission staff on each of the campuses. A wide range of documentary evidence was scrutinised both in advance of the inspection and during the inspection visits. Teaching observations were carried out in Malawi and Zambia. The Institution cooperated very positively with the inspection preparations and the visits.

PART B - JUDGMENT AND EVIDENCE

The following judgments and comments are based upon evidence seen by the inspector(s) during the inspection and from documentation provided by the institution.

INSPECTION AREA - GOVERNANCE, STRATEGY AND FINANCIAL MANAGEMENT

1.	The institution is effectively and responsibly governed			
1.1	The overall organisational structure, including the role and extent of authority of	☐ Yes	⊠ No	
	any owners, directors or governing body, is clearly defined, documented and			
	effectively communicated to stakeholders, including governors, management, staff			
	and students.			
1.2	There is an identified senior committee, with decision-making authority on		□ No	
	academic matters, in order to protect the integrity of academic freedom.			
1.3	The link between governance and management is clearly articulated and	⊠ Yes	□ No	
	documented.			
1.4	Internal stakeholders develop and implement policy through appropriate	⊠ Yes	□ No	
	structures and processes while involving external stakeholders			
1.5	An explicit procedure for risk assessment is implemented, producing a risk	⊠ Yes	□ No	
	assessment statement, which is regularly reviewed and updated.			
1.6	Effective action is taken, by the governing body and senior managers, in response	⊠ Yes	□ No	
	to the outcomes of regular risk assessments.		-	
1.7	All relationships with other educational organisations are defined formally and are	⊠ Yes	□ No □ NA	
	fully transparent with those organisations' requirements.		-	
1.8	There are clear channels of communication between the governing body, the	⊠ Yes	□ No	
	executive, academic management, staff, including those working remotely,		-	
	students and other stakeholders.

Senior managers ensure ation reports are drafted and submitted to the board of directors for their approval.	that moning the that moning the that moning the that is the that moning the third moning the the third moning the third mo	nitoring and Policies and thority	

A clear risk assessment policy is in place and risk assessment reports are drafted by the senior management team and reviewed on an ongoing basis by both the university council and the board of directors. Actions in response to identified risks are agreed by the senior bodies and implementation is overseen by the senior management team including the Chief Finance Officer, the Vice Chancellor and the Pro-Vice Chancellors at a federal and regional level.

Relationships with partner universities are formally defined in memoranda of understanding. The memoranda set out clearly the responsibilities of both parties in relation to programme development and facilities for programme delivery, including Unicaf facilities linked to partner university campuses in Zambia and Malawi.

Communication channels are in place to allow information to be passed between levels of the Institution through the committee structure. Reports are drafted at programme, faculty, department and senior management level, and reviewed by senior committees before being brought to the attention of the board of directors. The board of directors communicates with the senior management team who in turn ensure messages are passed to staff through managers of departments and faculties.

The Institution has effective mechanisms for ensuring that it is effectively governed, based on clear policies, procedures and the committee structure.

2.	The institution has a clear and achievable strategy		
2.1	The institution has a clear strategy for the development of its higher education		□ No
	provision, which is supported by appropriate implementation plans and financial		
	management and takes into account the quality of the student experience.		
2.2	There is provision for stakeholder input, including governors, management, staff and		□ No
	students, to inform the strategic direction of the institution.		
2.3	The strategy is well communicated to all stakeholders within and outside the institution.	☐ Yes	⊠ No
2.4	The governing body and senior management conduct a regular and systematic review of		□ No
	their own performance and the institution's overall performance and each are		
	measured against strategic targets.		

This standard is judged to be:

Comments

The Institution Strategy 2018 to 2023 has been drafted by the senior management and reviewed by the senior committees prior to being approved by the board of directors. The strategic plan reflects the priorities of internal and external stakeholders and the mission of the Institution. Implementation plans reflect the requirements of programme delivery and the need to ensure programmes are supported by high quality online materials and library resources to deliver a positive student experience.

☐ Met

☑ Partially Met

☐ Not Met

Stakeholders, including advisory boards in Malawi and Zambia, along with feedback from students and staff inform the development of strategic priorities. Priorities include management of resource and programme development as well as the setting up of new centres across Africa to make learning accessible. Students and staff, as well as external stakeholders, are invited to participate in a number of events including the annual Unicaf conference, where they have an opportunity to inform priorities.

2.3 The Institution strategy is communicated to senior staff, but is not accessible or communicated to all staff, students and external stakeholders.

Regular and systematic reviews are conducted by the senior management including external audits with terms of reference and key performance indicators agreed by the board of directors. Performance is measured against key performance indicators which include financial, recruitment and student achievement targets.

The clear institutional strategy sets out priorities for growth and development across Africa to bring opportunities for

the development of new programmes are supported by the regular review of job descriptions and the allocation of responsibilities by senior managers. The committee structure and the role of individual committees are clearly set out in the individual committees' terms of reference, which also include both the membership and frequency of meetings. All meetings are clearly recorded, and associated action plans are developed. Appropriate procedures are in place for the production of information for internal and external publication. Information is devised at programme or department level and then reviewed by managers and forwarded to senior management for approval. The Vice Chancellor and the Pro-Vice Chancellors regularly review information to ensure that it remains accurate and fit for purpose. Clearly documented procedures and responsibilities support the effective management of the Institution and regional campuses. 5. The institution is administered effectively The size of the administrative team is sufficient to ensure the effective day-to-day 5.1 ⊠ Yes □ No running of the institution. The administrative support available to the management is clearly defined, documented 5.2 ⊠ Yes □ No and understood and appropriately focused to support its activities. Administrative policies, procedures and systems are well documented and disseminated 5.3 ⊠ Yes □ No effectively across the institution. 5.4 Classes are timetabled and rooms allocated appropriately for the courses offered. ⊠ Yes □ No 5.5 Data collection and collation systems are well documented, accurate and effectively □ No disseminated. 5.6 Comprehensive administrative records are organised and stored efficiently, easily ⊠ Yes □ No accessed and used effectively. 5.7 Students' records are sufficient, accurately maintained and up-to-date. □ No 5.8 Staff records are sufficient, accurately maintained and up-to-date. □ No 5.9 The institution has a robust security system and policies in place for protecting the data □ No of its students and staff. The institution has processes, through which the institution verifies the student who □ No registers on the programme is the same student who participates on and completes and receives the credit. 5.11 There are secure and efficient procedures for the administration of examinations and ⊠ Yes □ No other means of assessment. 5.12 There are effective procedures for internal and external moderation at pre- and post-□ No assessment stages. 5.13 The institution makes student records and transcripts available to its students in a □ No timely manner. 5.14 There is a policy on the collection of and refund of students' fees which implemented ⊠ Yes □ No effectively. This standard is judged to be: \boxtimes Met ☐ Partially Met ☐ Not Met **Comments** The Institution has expanded significantly over the last few years, which has led to the need to recruit more administrative staff to effectively support all ongoing functions of the Institution. The team at the administrative office

of Unicaf University Federal is sufficient to support the key functions of the organisation including student admissions,

enrolment, student services and the management of data.

The administrative team functions are clearly set out in the departmental organisation chart and are appropriately structured to support management functions. Job descriptions detail the individual post responsibilities along with clear reporting lines which are available to departmental staff.

Policies and procedures are appropriate to support the functions of the Institution. Clear policy documentation is maintained by the administrative office of Unicaf University Federal in Cyprus. Supplementary local policies are developed to comply with the national higher education authorities in Malawi and Zambia and made available to staff as appropriate.

Clear procedures are in place for the timetabling of classes and tutorials for those students on the blended learning option in Malawi and Zambia. The process is centrally managed by the administrative office of Unicaf University Federal in Cyprus who liaise with local administrators and managers. Online support is also monitored centrally, with academic staff expected to be available at least four days per week.

Data collection and data management responsibilities are set out in clear policies and procedures which are adhered to by all staff. Data collected at campus level is checked and then forwarded to the administrative office of Unicaf University Federal in Cyprus where data is processed, checked and used to inform programme and management reports. All data is securely stored and encrypted as appropriate.

Administrative records are checked and collated at a local level with detailed oversight and tracking undertaken by the administrative office of Unicaf University Federal in Cyprus. The administrative office of Unicaf University Federal in Cyprus provides regular updates to senior management on student recruitment, retention, achievement and feedback. All records are securely stored with electronic data protected by passwords accessible to approved staff only. Data is accessible and made available to management staff at a federal and campus level to support the ongoing management and evaluation of provision.

Student records are stored on an appropriate Student Information System (SIS) which is accessible to management and regularly checked and updated by the administrative teams to include student results, and any changes of circumstances. Students are able to access their information and results through the SIS using individual logins.

The human resources department is responsible for the management of staff records which are regularly updated to include any continuous professional development. Records are securely stored at the administrative office of Unicaf University Federal in Cyprus.

Data protection systems are robust and reflected in organisational policies to ensure that data is managed in accordance with data management legislation in the European Union (EU) and the requirements of the countries in which the campuses are located.

Robust systems are in place to confirm the identification of all students who register on programmes and to whom credits are awarded. All students provide copies of passports and transcripts of previous qualifications as appropriate.

All assessments take place online. Students have access to clear module handbooks and assignment briefs through the VLE, and submit their work electronically using individual logins.

Marked work is systematically sampled by the quality assurance staff in Cyprus to ensure that grading decisions are appropriate and standards are consistently maintained. External academic staff are also used to sample work to further ensure that standards are being met.

Students are able to access their grades and feedback from tutors via the SIS system and the VLE. Lecturers post results to the appropriate section of the online administration of courses system, and these are then made available to students who have logins to access their grades. Grades are made available to students within two weeks of the submission of assessments and in many cases within a week. The rapid management of assessment and feedback represents good practice in supporting students to improve their work.

The policy for the collection and refund of student fees is made available to students at the enrolment stage. The policy clearly specifies fees, the procedures for the collection of fees at programme and module registration stages, as well as the circumstances in which refunds may be approved.

The administrative support is clearly defined and understood by all staff and provides appropriate support to ensure that the Institution functions effectively.

This s	standard is judged to be:	☐ Not Met	

Comments

Effective recruitment policies and procedures are in place to check the suitability and qualifications of all staff. Qualifications are authenticated and references followed up by human resources staff as appropriate. Criminal records checks are carried out with local authorities to ensure teaching staff are safe to deliver blended learning to students.

All staff have clear job descriptions setting out key duties and responsibilities, with clear roles and reporting lines identified for the senior managers. All staff are suitably qualified for their respective roles with previous teaching experience. All academic staff have degree qualifications, and in most cases hold postgraduate qualifications at a level above the qualification on which they teach. Staff delivering doctorate level qualifications are required to have a doctorate.

There is a comprehensive online induction programme including modules to help new staff learn how to use the online software. All academic staff are required to complete and pass the Tutor Orientation Course (TOC) as part of their induction to the Institution.

A clear and appropriate policy on equality and diversity is in place along with a complaints procedure, available to staff through the VLE. Staff confirmed that they are aware of policies to avoid discrimination and that staff have equal rights and the opportunity to make formal complaints if required.

There are regular Continuing Professional Development (CPD) activities for staff including those focusing on good pedagogical practices. Staff are supported by senior managers to obtain additional skills and qualifications as appropriate. Unicaf University also offers teaching staff an 85 per cent discount to study for a Unicaf doctorate qualification.

The performance of all staff is monitored through performance reviews and in the case of teaching staff, observations of teaching take place at regular intervals. However, the appraisal system has only recently been implemented for all staff, having been trialed with the staff at the administrative office of Unicaf University Federal in Cyprus, and is now being introduced for staff working in Malawi and Zambia. The outcomes of teaching observations are used to inform

staff development requirements along with module feedback from students. Where development needs are identified, support is put in place to provide appropriate training, coordinated by the staff at the administrative office of Unicaf University Federal in Cyprus. The recruitment procedures, which include the checking of qualifications and suitability for teaching or administrative roles, ensure that appropriately qualified and experienced staff are recruited to both teaching and administrative positions. 7. Academic management is effective There are appropriate procedures for the proposal, design and validation of 7.1 □ No programmes of study, which take account of the mission of the institution. 7.2 Intended learning outcomes for all programmes are clearly articulated, understood □ No by students and are publicly available. There are regularly scheduled and recorded meetings of academic staff where 7.3 ⊠ Yes ☐ No academic programmes are reviewed. 7.4 There is an appropriate policy and effective procedures for the acquisition of □ No academic resources to support programmes. 7.5 Commissioning of course materials is managed effectively and materials and the ⊠ Yes ☐ No budget are checked to ensure standardisation and consistency across the provision. 7.6 Students are encouraged to take an active role in the development of the academic provision to ensure student centered learning. This standard is judged to be: ⊠ Met ☐ Partially Met ☐ Not Met Comments There are clear processes in place for the development of programmes, including consultation with stakeholders. Local advisory boards are convened which include local sector and business external representatives. The detailed validation process also includes approval and compliance with local higher education authorities. The programme specifications which detail the learning outcomes for each course, the assessment strategies and marking schemes are clear and are available for all staff and students to download from the VLE. All programmes have regular module reviews, and each full cycle of a qualification triggers a programme review with a committee made up of teaching staff, other academics, industry professionals and students. A clear process and a record of acquisitions and requests for resources are in place to ensure a fast and efficient response in order to support the growth of the provision offered at each campus. Academic staff are able to identify additional resources based on their own research and feedback from students. Course materials, resources and online module content are developed centrally by dedicated programme teams to ensure consistency across all qualifications and sites. Budgets are approved by senior management based on rationales submitted by academic teams. Students provide feedback via a questionnaire for every module studied. Students also have the opportunity to talk to student union representatives and to raise questions or provide feedback about a specific programme or campus

The clear policies and procedures for the development and review of programmes support the effective academic management of provision.

8. The institution takes reasonable care to recruit and enrol suitable students for its courses

related issues. Students are also able to provide ongoing feedback through their tutors.

8.1	clearly stated in the programme descriptions seen by prospective students.	⊠ Yes	□ No

This s	tandard is judged to be: ☑ Met ☐ Partially Met	□ Not Me	et

Comments

The entry requirements for all programmes are published on the Institution's website and are included in the clear and accessible programme descriptors.

The English language requirements for undergraduate and postgraduate provision are appropriately included on the website, and also confirmed under the admissions criteria. Prospective students are notified that they should have evidence of English language proficiency although, where this is not available, applicants may take an English language test.

Students have access to a clear online application procedure, and all applications are reviewed by the admissions officers who check that applicants meet the entry criteria, and also verify previous qualifications submitted by applicants. Where prospective students enquire about qualifications through the Malawi and Zambian campuses, trained enrolment student advisors provide face-to-face advice and guidance to inform student choices and ensure that they are clear about the entry requirements. Enrolment advisors also available to assist prospective students with making an application which represents good practice.

All application enquiries are handled promptly with applications being reviewed and responded to normally within 24 to 48 hours. Student enrolment advisors are also available to provide clarification on course content, entry requirements, methods of payment and information on how to apply for scholarships. The support available to prospective students effectively supports informed choices of programme. However, the duration of programmes and number of modules to be completed each year is not always clear and students indicated they would find this information useful.

Clear and robust systems are in place to ensure that applicants have the capability to complete their chosen programme. Prospective students are required to provide evidence of previous qualifications and English language proficiency, and certificates or transcripts linked to previous qualification are checked to ensure that entry requirements are met. Applicants' language skills are also assessed through admissions interviews and students' personal statements, which provide further evidence to inform the admission decisions. The admissions process supported by advice from enrolment student advisors effectively ensures that applicants understand the skills and knowledge requirements of programmes. The Institution also ensures that applicants understand that they are responsible for checking that they will be able to engage with their chosen programme as part of the admission procedures.

A clear policy on the accreditation of prior learning is available to prospective students. Prior experiential learning is considered as a part of the applications process, so that students may be able to apply for entry to a master's programme with higher national diplomas or equivalent qualifications and at least two years' sector related work experience. Each case is considered on individual merit. Where a student may not meet the experience requirements for master's level study, enrolment advisors follow up and contact the applicant at a later point to check whether they may have gained the required experience to meet entry requirements.

Few agents are used by the Institution, and those who work with Unicaf University are provided with clear information about the provision, entry requirements and the online admissions process. All interested applicants are then directed to talk to enrolment advisors.

Unical University has a clear and well managed system which effectively ensure that appropriate students are enrolled onto the online and blended learning provision.

The formal application process for staff development, materials and CPD activities is fair and transparent. 9.1 However, there are limited formal processes to encourage and facilitate staff to undertake research and to publish				
and d	speakers, meetings and an online teaching forum on the VLE offer opportunities for staff to share good practice scuss research activities. The annual conference also allows senior managers from each site to meet and unicate ideas, and to discuss recent research developments which informs programme development.			
The Institution is planning to develop a research strategy and support systems for staff undertaking research and to provide opportunities for publication. There is currently no strategy or minimum requirement for staff to undertake research or specific scholarly activities, though staff are able to apply for support to attend conferences or to participate in other events.				
	ampuses in Malawi and in Zambia organise guest lectures which are also open to the public. Staff are able to use aline communications systems to share their own research and to participate in discussions.			
devel	preship activities are supported by the Institution which shares good pedagogical practices through staff oppment activities and the VLE. As a non-research institution, the development of research communities is still in the stages.			

Publicity material, both printed and electronic, gives a comprehensive, up-to-date and accurate description of the institution and its curriculum

Comments Students have access to both an online student services support staff and to module tutors, who are readily available to respond to student queries, both academic and pastoral. The Malawi campus includes the provision of an onsite medical centre staffed by a nurse where students and staff have access to free medical assessments and minor injuries treatment as required.						

A well-structured and constructive online induction module which includes basic computer skills and library information is made available to all students. Students confirmed that they find the module straightforward and comprehensive.

As a mainly online based institution, students are provided with a step by step guide on how to use the VLE and online library, as well as information on technical support should they encounter IT issues. Pastoral support and IT support is available through student services staff based at the administrative office of Unicaf University Federal in Cyprus, who respond promptly to students' messages, as well as through academic and administrative staff based in Malawi and Zambia. Students also have contact numbers for staff based at the regional campuses. However, the use of social media and other messaging services, which are external to the organisation, do not provide a clear and accurate record of all correspondence between staff and students.

There is a clear policy on discrimination and abusive behavior, and students are made aware of the disciplinary procedures linked to breaches of the student code of conduct.

14.8 The Institution does not have a risk assessment, policy or training to raise staff awareness of the dangers of radicalisation and extremism.

Students have access to appropriate support and guidance primarily through online contacts and campus staff which they confirm provides effective help and support as needed.

15 .	Students receive appropriate academic support and guidance			
15.1	Students have appropriate access to teaching staff outside teaching and learning sessions.	⊠ Yes	□ No	
15.2	Students have access to appropriate support to enable the regular review of their academic progress.	⊠ Yes	□ No	
15.3	Assessment outcomes are monitored to enable the identification of students who are not making satisfactory progress and prompt intervention is made, where appropriate.	⊠ Yes	□ No	
15.4	Academic support, advice and guidance on alternative programmes are provided to students who are judged not to be making sufficient progress and/or who wish to change their pattern of study.	⊠ Yes	□ No	
15.5	Students have access to appropriate advice and guidance on careers and further study and any professional body exemptions that may be available.	⊠ Yes	□ No	
15.6	The institution has a fair complaints procedure that includes an external Adjudicator, for example, the Office of the Independent Adjudicator (OIA) in the UK, and students are informed of how to submit a complaint.			
15.7	Instructions and suggestions on how to study are made available to assist students to learn effectively and efficiently.	⊠ Yes	□ No	
15.8	Students with special educational needs and disabilities (SEND) are identified so that appropriate support can be provided.	⊠ Yes	□ No	
This s	tandard is judged to be:	□ Not Met		

Students are provided with academic staff contact details through programme and module handbooks. Students are able to e-mail the module tutors and other teaching staff outside teaching and learning sessions, and normally receive responses within 24 hours.

Information on student attendance, progress and achievements is recorded on an ongoing basis, and students are able to access their grades and feedback through the online student information system. Where students are not logging on to modules, attending tutorials or failing to submit work, messages are sent requesting clarification of circumstances, and meetings with tutors or support staff arranged, as appropriate. To further improve the monitoring of student

engagement, the Institution is introducing improvements to systems to gather and analyse all student engagement information more effectively. Student advisors are readily available to offer students advice and guidance as to alternative options of study should they wish to withdraw or change their programme of mode of study. These advisors are available for both face-to-face and online consultations. The significant majority of students are studying whilst also working and seeking to gain qualifications to promote career progression. As far as possible, staff with professional sector knowledge are available to offer support and guidance. The student complaints policy and procedure are clear and accessible to students through the VLE. Students can informally raise a complaint before proceeding to raise a formal complaint which is responded to within specified timelines, with use of external adjudication as appropriate. However, no central register of complaints is held at either regional or federal level. The induction module, which must be passed by all students, offers clear guidance to students on how to study and learn effectively and efficiently. The Institution has some specialist provision in place to support those students with special educational needs, including an audio typing system, a ramp and an IT study centre on the ground floor in Malawi. Where additional needs are declared or identified, additional help is provided, and students are advised of the support available. Students receive appropriate academic support and guidance through the online access to tutors and other support staff as required.

16.	International students are provided with specific advice	e and ass	sistance

Comments

Two clear international student guidebooks are available on the website which are specific to the respective campuses in Malawi and Zambia. These include useful information about the Institution and the campuses, and about the country of study with details of typical living costs included. All students must take an online induction module and, for international students studying through blended learning, this is supplemented with an orientation programme on campus.

The online nature of programmes delivered by Unicaf allows for flexibility with time zones, prayer time and other issues related to electricity supplies or online connections in remote regions.

Additional guidance and support are available through the VLE, online, via telephone or through face-to-face support at any Unicaf learning centre or campus. There are international support staff who can deal with regional issues and speak different languages to aid communications with learners. Students expressed satisfaction with the support provided by the university, and feedback from students confirms that communication with support and guidance teams is timely and informative.

Comn	nents		

The administration offices on all sites are sufficient to house the administrative staff and are networked to allow for the easy exchange of information between the administrative office of Unicaf University Federal in Cyprus and the

campuses.

The VLE online system allows learners to access course content and lessons from a variety of different mobile platforms. The system is robust with a dedicated IT development and support team. Some learners have experienced slow internet connections, particularly in Malawi. However, this is due to the broadband service in specific regions as opposed to any problems with the VLE servers or access issues.

The online resources and tasks set within each module encourage discussion and group work. The induction process also includes details of academic and additional support available throughout the duration of study.

There are currently a sufficient number of computers in Malawi, some with specialist software installed for learners with visual impairments. The Zambia campus currently requires some additional computers with a capital bid already submitted to the federal committee to provide more computer access for blended learners. Acquisitions and capital bids processes are clear and responsive to learner needs.

A dedicated VLE development team and IT support provide a very comprehensive learning platform and access to specialist support services. The servers are maintained by a large well-known specialist online service provider who ensures additional storage space is always available for expansion and additional demand. This ensures consistent online access for staff and learners and represents good practice.

The IT resources and support services ensure that students and staff have access to learning resources which are fit for purpose.

INSPECTION AREA - QUALITY MANAGEMENT, ASSURANCE AND ENHANCEMENT

Comr	ments						

The Institution regularly obtains feedback from learners which informs course development, module reviews and programme reviews. Local academic staff, student representatives, academic and industry professionals sit on appropriate committees to review the curriculum and support the development of new provision. All meetings are appropriately recorded. The Institution also has a programme of open lectures to which the public are invited. These are of interest to local businesses and the community. Short IT courses are also offered free of charge to high school students in Malawi to help them improve their knowledge of online systems.

Each campus has a student union with elected representatives with a remit to represent learners views. Representatives gather feedback about the programmes, resources and any other local problems. The information gathered is considered by the Institution as part of its academic reviews and scheduled senior management meetings.

The senior management at each campus and at the administrative office of Unicaf University Federal in Cyprus take forward developments including revisions in programme specifications, campus facilities and online provision based on student and external stakeholder feedback.

26.3 However, changes, developments or improvements that have been made in response to the feedback are not formally communicated to learners or external stakeholders.

Feedback is regularly and systematically collected from all stakeholders and effectively informs the continuing development and ongoing management of the provision.

21.	The institution has effective systems to review its own standards and assess its o	wn periori	nance
27.1	All quality management policies and procedures are clearly documented and are brought to the attention of staff and, where appropriate, students and other	⊠ Yes	□ No

Comments

Clear and effective documentation guides the management of quality assurance. The Institution's quality assurance policies and procedures are effectively introduced to staff as part of the TOC which forms part of the new teaching staff induction process. A comprehensive tutor handbook is also available online. Students confirmed they are aware of the second marking and moderation procedures that form part of the quality assurance process.

The quality assurance department at the administrative office of Unicaf University Federal in Cyprus maintains effective oversight of standards and provides regular reports to the senior management. Reports include the evaluation of student data and information on an ongoing basis against targets and key performance indicators linked to the strategic plan. Campus senior managers, deans of schools and programme leaders all regularly review end of module and end of programme reports as part of the embedded quality assurance and review procedures.

Clear templates support the production of annual monitoring reports at both programme and institution level. Reports are reviewed by the senior management team, the senate as the senior academic forum, and the council as the senior administrative body, and action plans and priorities are agreed. Management reports are compiled at least twice per year and senior management review the overall performance of the Institution against established performance indicators including recruitment, retention and achievement targets. Minutes of management meetings include the discussion of institutional performance, and areas for further development are included in action plans.

The Institution has effective mechanisms for collecting and analysing student feedback to inform the oversight of the quality of the student learning experience. Students complete feedback surveys at the end of each module and results are collated and evaluated by the administrative office of Unicaf University Federal in Cyprus and distributed to campuses, programme leaders and to senior managers as appropriate. The regular feedback from students informs the course reports and annual monitoring reports and areas for improvement are identified.

The requirements for module and programme reports are well understood. Programme reports and annual monitoring reports include the consideration of student feedback as well as completion and achievement data against set targets. Management also compile year on year data tables which are evaluated as part of management reports. The information effectively informs the annual monitoring procedures. As most students are studying part-time whilst also working, information collected focuses on career progression and promotion information rather than progression into employment.

Staff performance is reviewed against key performance indicators which also form part of the staff appraisal process. Student satisfaction and success rates are reviewed at programme, campus and institution level. Module evaluation reports are analysed to monitor the quality of learning and also considered by the teaching and learning committee to identify where improvements need to be made, resources updated and other issues addressed.

The Institution does not have a formal research base but staff are supported to travel to conferences and to engage with activities to support their current knowledge and sector expertise.

Programmes are regularly reviewed, with full periodic reviews taking place every two to three years, to ensure that they remain current and fit for purpose. Where programmes are being developed, reviewed or revalidated, local advisory boards including external stakeholders are established to ensure that new and revised programmes meet sector employment needs. The consultation with local employers and sector professional represents good practice.

Programme reports are effectively used to inform regional and federal action planning. Key priorities are discussed by campus management who liaise with the management at the administrative office of Unicaf University Federal in Cyprus. Regular meetings take place between regional and central vice chancellors and pro-vice chancellors to identify priorities for development, and recommendations presented to senior committees and the board of directors for approval. Action plans linked to committee and management meetings are then used to track and evaluate progress.

The clear policies and procedures supported by effective communication channels and quality assurance mechanisms to ensure that standards are consistently monitored and performance against set targets are tracked.

28.	The institution has a strong commitment to, and procedures that facilitate, continuing enhancement of its provision
28.1	Good practice is effectively identified and disseminated across the institution.
28.2	End-of session course and annual programme reports include improvement and ongoing developments made and identify further areas requiring enhancement.
28.3	Action plans for enhancement are implemented and reviewed regularly within the institution's committee structure.
This s	tandard is judged to be:

Comments

Well established mechanisms are in place for the identification and sharing of good practice. Module and course reports along with peer reviews of teaching are used effectively to identify both good practices and areas for development. The monitoring processes provide the opportunity for staff at module, programme and faculty level to reflect on the operation of provision and to highlight good practices and areas for improvement. Good practices are shared across the Institution through the VLE and electronic messages to enable broader staff access.

Monitoring reports are reviewed by the teaching and learning committee and by senior management. Actions plans are developed drawing on annual monitoring reports and the evaluation of previous report actions and recommendations. Action plans are regularly reviewed through the Institution's committee structure with oversight maintained by the senior management team at both federal and regional level.

The strong commitment of the Institution to the continuing enhancement of provision is effectively supported by review procedures and monitoring reports.

Comments

All teaching staff are effectively supported to understand the requirements of online and blended learning. All teaching staff are required to take and pass the online TOC comprised of four modules, which provides well-structured training to support online delivery. The TOC includes information on the regulations and guidelines for the delivery of programmes. All lecturers are required to pass quizzes about Unicaf regulations, and to pass the TOC module tests with a minimum score of 70 per cent. The training course coordinator meets with all new lecturers and verifies their readiness to be allocated teaching. The training and support provided to new tutors represent good practice.

Tutors who deliver blended learning modules engage in peer observation to assist them in developing their practices. The use of the online systems is fully covered through the TOC training and staff are familiar with the functions of the VLE by the time their training is complete. Tutors also have access to the Local Tutor Resource Centre (LTRC) which provides updates on pedagogy and communication strategies for face-to-face teaching. The TOC and LTRCs ensure that staff have a clear understanding and access to additional materials to enable the effective teaching of online and blended learning.

The clear and comprehensive online student induction module provides students with information and practical training to develop their understanding of the VLE and to develop digital literacy skills. All students must pass their induction module before they are provided with access to their programme modules. Students receive guidance on how to study and are provided with clear timelines within which online materials must be studied and activities, both

formative and summative, completed. Students have access to support online both through the student support
services and the tutor allocated to the delivery of the module.

The comprehensive online training provision for staff and for students ensures that they are well prepared to engage with online learnings. Training ensures that staff are clear about the challenges and the good practices associated with the delivery of online and blended learning. Both staff and students have access to a wide range of online resources and access to clear information, guidance and support.

ONLINE, DISTANCE AND BLENDED LEARNING

Institution's Strengths

The comprehensive training and support provided to teaching staff and new tutors ensures that tutors have the knowledge and understanding to support online learning delivery well.		
The support provided to teaching staff through the tutor resources centres effectively supports the online and blended learning programme delivery.

RECOMMENDED AREAS FOR IMPROVEMENT

It is recommended that the Institution implements performance reviews for staff across all countries to help identify staff development needs and to inform the provision of continuous professional development.

The Institution should consider including the duration of programmes and number of modules to be completed each year as part of pre-course information to enhance transparency.

It is recommended that the Institution develops a framework and procedures for the consistent and effective management of dissertations and to provide clear information to the research committee.

It is recommended that the Institution ensures that the percentage guidance on similarity scores is consistently implemented across all provision and campuses, and that similarity scores are included in the feedback rubrics to highlight plagiarism incidence and risks to students.

The Institution should consider only using channels for formal communications with students which utilise safe messaging services and provide a reliable record of communications.

The Institution should consider developing information, advice and guidance for all students on careers and further studies to support their progression into further study or employment.

It is recommended that a complaints register be instituted to support the management oversight of issues identified by students and to support enhancements.

COMPLIANCE WITH STATUTORY REQUIREMENTS

The fire extinguisher provision on the Zambian campus does not meet local authority statutory requirements, as noted by the Zambian Higher Education Authority during the visit in November 2018. Provision of additional fire extinguishers is identified in the Zambian campus action plan and had not been implemented at the time of the inspection visit.
